[View and print English handout](#)

[View and print Spanish handout](#)

- received opioid overdose prevention training. Training included the following and a handout was provided:
 - Types of opioids
 - Causes of opioid overdose
 - Identifying and avoiding high risk situations for overdose
 - Opioid overdose prevention and risk reduction strategies
 - Responding to an opioid overdose (universal safety precautions, rescue breathing, calling 911 and administration of Narcan)
 - Use of Narcan (how it works, how to administer and what to expect after it being administered)
 - Intranasal
 - Injection

- declined opioid overdose prevention training **but accepted** the opioid overdose prevention handout.
- declined opioid overdose prevention training **and was not interested** in the overdose prevention handout.

is aware that they can go to their local Walgreens pharmacy to obtain a supply of Narcan. Most medical insurances cover the cost of Narcan; however, if Narcan is not covered by the medical insurance the cost is approximately \$30.00. There is an additional charge between \$5.00 - \$10.00 at the pharmacy for the nasal adapter.
